Work Experience

WordPress Developer

Dec 2024 - Jun 2025

Self-Employed (Freelance) | Remote

Designed and developed custom WordPress themes and plugins, tailored to client branding and functionality requirements.

Converted Figma/PSD designs into responsive WordPress websites using HTML5, CSS3, PHP, and JavaScript.

Implemented WooCommerce solutions for eCommerce clients, including product setup, payment gateway integration, and performance optimization.

Optimized websites for speed and SEO using tools like WP Rocket, Yoast SEO, and image compression, achieving 90+ scores on Google PageSpeed.

Set up and configured CMS dashboards for clients, enabling non-technical users to manage site content easily.

Handled site migrations, backups, and security hardening, reducing client vulnerability to attacks and ensuring stable deployments.

Worked with popular page builders like Elementor, WPBakery, and Gutenberg to deliver flexible layouts and smooth editing experiences.

Mobile App Developer

Dec 2023 - Dec 2024

Dev with Gozie | Onitsha, Anambra

Designed and developed cross-platform mobile applications using React Native, delivering smooth performance and consistent UI across both Android and iOS devices.

Built and maintained 20+ reusable components with JavaScript (ES6) and integrated native modules for camera, push notifications, and geolocation features.

Implemented Firebase Authentication, Firestore, and Realtime Database for secure user login, data sync, and cloud-based app functionality.

Integrated third-party APIs such as Google Maps, Stripe, Twilio, and OneSignal, enhancing app functionality with real-time features and secure payments.

Optimized app performance through lazy loading, efficient asset handling, and minimizing bridge calls, resulting in a 30% boost in startup speed.

Deployed apps to Google Play Store and Apple App Store using EAS Build and App Store Connect, and managed versioning and OTA updates with Expo Updates.

Conducted extensive testing with Jest, Detox, and manual QA, reducing bugs and ensuring a stable user experience across devices.

Worked in Agile development cycles and used tools like Git, Trello, and Slack for effective collaboration and task management.

Software Engineer

Feb 2021 - Dec 2023

Mac Dee Web Masters | Onitsha, Anambra

Built responsive and dynamic user interfaces using React.js, HTML5, CSS3, and Bootstrap, ensuring pixel-perfect layouts and cross-browser compatibility.

Developed over 20+ reusable components with modern JavaScript (ES6+) and implemented Redux for predictable state management across large-scale projects.

Collaborated with UI/UX designers to revamp outdated web pages using Figma and modern frameworks, resulting in a 25% boost in user engagement.

Integrated and optimized REST APIs for seamless backend communication using tools like Axios and Fetch, enhancing data flow and user experience.

Ensured performance and SEO optimization using Next.js and lazy-loading techniques, achieving 90+ Lighthouse scores on major pages.

Deployed and maintained web applications on platforms like Netlify, Vercel, and Firebase Hosting, enabling fast global delivery and CI/CD workflows.

Wrote unit tests using Jest and React Testing Library, maintaining code reliability and ensuring high test coverage across critical components.

Participated in Agile sprints, Git-based collaboration, and regular standups, ensuring timely delivery of features and smooth teamwork.
